

Stones

DYMANTIA

Stone picker for big and medium stones

The stone pickers **DYMANTIA** have been designed specially to pick up stones up to 500 kg from the surface of agricultural lands.

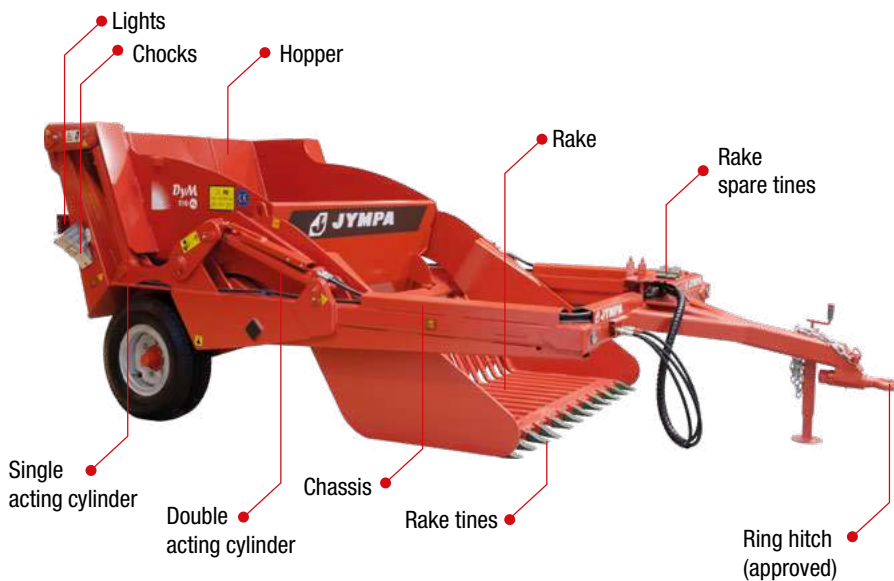

With a very robust and reliable design and a fully hydraulic drive, they deliver excellent results even in very rocky terrains. The rake picks up the stones and deposit them in the hopper for its subsequent download.

They were the first stone pickers manufactured by JYMPA 50 years ago. Since then, their design has been improved and the range of models has been extended to meet all the needs.

**“Reliability
and resistance”**

Model DYM-210-XL

Model DYM-210-XL

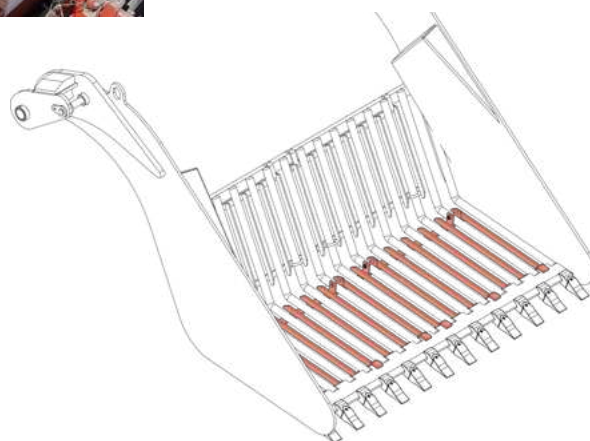

EUROPEAN TYPE-APPROVAL

No. 167/2013

On the approval and market surveillance of agricultural and forestry vehicles

Optional elements:

- K80 hitch
- 11,5/80-15,3 wheels for DYM-210-XL

Extra grate
