Cultivators with hydraulic width adjustment and in-row weeder

DAVID
SMART FARMING SOLUTIONS

SERIE

DAVICULTOR

Cultivators with hydraulic width adjustment and in-row weeder, specially designed for primary tillage in vineyards and orchards.

PICTURE MODEL:
CXH7-P + TH-EC + RA30-12-P

Versatility

- The widest range of products and accessories on the market. A custom configuration to suit your needs.
- Multiple tools for the in-row weeder that allow both surface working and tillage up to 20 cm deep.
- The ID-CONTROL joystick allows to control all the machines manufactured by ID David and equipped with the ID-PLUS or ID-MICRO technology.

Exclusivity

- The exclusive undervine weeder that combines the "parallelogram-radial" movement.
- Opportunity to work between plants starting from 1 cm diameter thanks to our adjustable and progressive electronic sensor, the arm is moving at the right time to save the plant.
- The special position of the tines makes possible to work always at the same distance between them, whether the cultivator is completely extended or narrowed, avoiding jamming.

Effectiveness

- Time is valuable, it is possible to work up to 12 km/h with a standard soil conditions.
- The easy adjusting of hydraulic pressure of the in row weeder assured a perfect work in any type of soil.
- The reinforced structure, hydraulically width adjustable, and the special tines enable to work with different types of ploughshare reaching a working depth of up to 25 cm.

Reliability

- Components and materials of high quality from certified manufacturers.
- The maintenance is reduced to a minimal due to the total absence of joints and ball joints as well as the heavy duty width extensions.
- Experience in the manufacture of electrohydraulic undervine weeders since 1974.

Safety

- As standard all models are fitted with an exclusive safety locking system in case of faults.
- Enables route deviations up to 30 cm in the plantation rows.
- Our equipment incorporates easy, comfortable and safe tool replacement systems.

Sustainability

- Ecological alternative to the use of herbicides.
- The low power required allows the use of small tractors with a lower carbon footprint.
- Improves the structure and porosity of the soil.

Standard Equipment

- Includes a PRO hydraulic unit.
- Anti-shock sensor protector.
- Kit of Shank + Spring + Plowshare DAVID by Bellota.
- Hydraulic pressure regulator.
- Electro hydraulic in row weeder.
- Tool kit for sensor regulation.
- Arm "D" and Plough blade to weed manufactured in boron steel.
- Quick connect kit for power tools.
- Security system under damages.
- Standard boron steel plowshare, hardness 50Hrc.
- Adjustable rear roller in height and width.
- Hydraulic width adj. direct to tractor (not available in fixed models).
- Quick attachment.

Remote control type

ID-PLUS

- Includes ID-CONTROL multifunction joystick.
- Includes ON-OFF of powered tools.
- Includes an electronic microcontroller: allows software updates at any time.
- Up to 5 additional electro-hydraulic functions.
- Includes a modular electro-hydraulic system: it allows to increase the number of electro-hydraulic functions.

ID-MICRO

- ! NOT included the ID-CONTROL multifunction joystick.
- Only for customers who already have the ID-CONTROL multifunction joystick.
- Includes ON-OFF of powered tools.
- Includes an electronic microcontroller: allows software updates at any time.
- Up to 5 additional electro-hydraulic functions.
- Includes a modular electro-hydraulic system: it allows to increase the number of electro-hydraulic functions.

ID-BASIC

- Includes an electric control box.
- Max. 1 additional electro-hydraulic function to choose between: PI-002 / PI-004 / EH-EC / TH-EC / IH-EC
- ! NOT allowed any updates of electro-hydraulic functions.

ID-PLUS DUAL

- Includes ID-CONTROL multifunction joystick.
- Includes ON-OFF of powered tools. Includes cooler and double pump.
- Includes an electronic microcontroller: allows software updates at any time.
- Up to 4 additional electro-hydraulic functions.
- Includes a modular electro-hydraulic system: it allows to increase the number of electro-hydraulic functions.
